BOSTON, MASS., FRIDAY, JANUARY 5, 1906

PRICE THREE CENTS.

1906 HOLDS ANNUAL DINNER.

Class Day Elections Announced. — Profs. Swain and Sedgwick Speak.

The annual dinner of the Senior Class, held on Wednesday evening at the Union, was noteworthy for the large attendance of one hundred and nine men, who gathered to hear the result of the Class Day elections, and also to hear the exceptionally vigorous and inspiring speeches by Profs. Swain and Sedgwick.

The Class Day elections resulted as follows: H. C. Henrici, First Marshal; C. F. W. Wetterer, Second Marshal; H. L. Williams, Third Marshal; C. T. Bartlett, L. G. Blodgett, G. W. Burpee, M. A. Coe, S. C. Coey, W. F. Englis, E. D. A. Frank, G. M. Henderson, A. W. Hertz, T. L. Hinckley, B. R. Honeyman, A. H. Keleher, W. J. Knapp, J. Lage, J. T. Lawton, M. T. Lightner, L. F. Mesmer, R. R. Patch, J. H. Polhemus, G. C. Simpson, P. B. Stanley, H. A. Terrell. These twenty-five men are distributed according to courses as follows: I., 7; II., 9; III., 3; IV., 2; VI., 3; XIII., 1.

The committee on the Senior Portfolio is composed of the following men; C. C. Coey, Chairman; L. F. Mesmer, R. R. Patch, J. H. Polhemus, H. A. Terrell.

Herbert L. Williams was introduced as toastmaster. A letter was read from Mr. Rand deploring his absence, which was necessary on account of a severe cold. Profs. Norton and Merrill, who were to speak, were also detained at home, and J. T. Lawton and W. J. Knapp, two of the speakers were unable to be present because of illness.

Professor Swain was the first speaker. His theme was the ideal relations between teacher and student. Great advances in the direction of personal acquaintance between the student body and the faculty have, he said, been made since the establishment of the Union. Prof. Swain laid especial emphasis on the fact that not every teacher, no matter how learned he may be, possesses the qualifications to put into practical operation himself those principles which he imparts to others. The teacher is not supposed to do the work himself but is to guide the man who comes to him with a mind receptive to his instruction. In the words of Mark Twain, "To be good is noble, but to show others how to be good is nobler — and not so much trouble." No one should resent criticism, but rather should welcome it as indicative of his own imperfections. Criticism is of infinitely more benefit than praise, and when a man no longer desires it his intellect is on the decline. In closing, Prof. Swain said that he would be glad of any criticism of his own methods from the men after they had graduated and had been out in the world long enough to realize what a great debt they owed to the Institute.

(Continued on page 3.)

TECH DEFEATS B. C.

Close and Exciting Game Ends with Score 23 to 21. Small Attendance.

Technology defeated Boston College at the Gym Wednesday evening 23 to 21, in one of the cleanest and hardest fought games Tech has played this season. With any kind of support, the home team would have completely defeated the B. C. five. There were only ten people present at the game, including all the reporters from the daily papers, and, although these ten cheered and stamped and made all the noise they could, the Tech five showed the effects of poor support.

The first half started with a rush, McGuinness, of Boston College, scoring a basket in thirty seconds. Tech came right back and scored five baskets in as many minutes. The men of both teams settled down to work then, and during the remainder of the half each team scored two baskets, and made two goals from the foul line. The half ended Tech 16, B. C. 8.

In the second half, Fitzgerald and Supple of the visiting team changed places, while Lyons, Tech, went in for Lamont, who had been badly shaken up in the first half by a hard fall. Boston College opened strongly, and McGuinness scored two baskets in rapid succession. During the remainder of the half, Gregory scored two baskets, and Wentworth got three goals from the foul line, making Tech 23. Before Wentworth made his last two baskets, Boston College had tied the score, and the play was fierce and exciting.

Wentworth did fine work on the foul line, scoring five baskets out of six tries. The team does not seem to have developed a good defensive game, as B. C. continually got away with the ball.

Burleigh was injured by hitting his shoulder on a parallel bar while running after the ball out of bounds and was obliged to retire in favor of Belcher. The line-up was as follows:

TECHNOLOGY	BOSTON COLLEGE
Gregory (Kinnear), l.f.	l.f., Supple
Deavitt, r.f.	r.f., Fitzgerald
Wentworth, c.	c., Sullivan
Burleigh (Belcher), l.b.	l.b., McGuinness
Lamont (Lyons), r.b.	r.b., O'Kane

Score: Tech 23, Boston College 21. Goals from floor: Burleigh (4), Gregory (4), Wentworth, Sullivan, Supple, Fitzgerald (4), McGuinness (2), O'Kane. Goals on fouls: Fitzgerald (3), Wentworth (5). Fouls called: Tech 6, Boston College 6. Fouls missed: Fitzgerald (3), Wentworth. Referee: Blake, Tech. Umpire: Koen, Boston College. Time: 20 minute halves. Attendance: 10.

CIVIL ENGINEERS MEET.

"Civil Engineering in Connection with Sanitation" was the subject of the lecture given to the Civil Engineering Society last evening. Mr. W. S. Johnson, '89, I., Assistant Engineer on the Massachusetts State Board of Health was the speaker.

CLASS MEET NEXT WEEK.

Annual Indoor Games to Decide Tech's Entries in B. A. A. Meet.

The Annual Indoor Class Meet will be held next Wednesday at the Gym. It is held at this early date because the B. A. A. Meet will be held early in February and it was felt necessary by the management to get a number of men out on the track before this meet.

This year no men will be allowed to enter for the M. I. T. A. A. in the B. A. A. events unless their entries are sanctioned by Major F. H. Briggs. This action is taken to prevent the recurrence of the position that Tech was placed in last year in the B. A. A. games when over forty men entered for Tech, very few of them competing, and only taking part as spectators. As a result Tech won only a second place in one event. This put Tech track athletics in a very bad light, and Coach Mahan, together with Major Briggs, have so arranged with the B. A. A. officials that such a thing will not happen again.

The Class Meet will give a chance for the men to show their ability, and their entries in the B. A. A. Meet will depend largely upon their work in this meet.

The events in the Class Meet this year will be the regulation B. A. A. events: 40-yard dash, 35-yard high hurdles, 600-yard, 1000-yard and 1-mile runs, pole vault, high jump and shot put.

The Class Relay Teams will be composed of five men, each running a 400-yard relay. The preliminaries in this event will be held next Tuesday afternoon, in order that the teams will be in better condition to compete on the night of the meet.

The first four places will count in each open event, and engraved cups will be given as prizes for the first three places.

Entry books have been placed in Rogers Corridor and in the Gym, and it is requested by the management that every man entering give his name, his initials and class.

Every one who has an interest in indoor track work or in the honor of his class should enter this meet.

The class track championship will be decided by the number of points won by each class, together with the points won in the fall handicap and spring meets.

PROF. SWAIN'S THIRD READING.

Prof. Swain's third reading to the Civil Engineers was given Wednesday afternoon in 6 Lowell. The selections read were from Lorrimer's "Letters of a Self-made Merchant to His Son," and were much enjoyed.

Prof. Swain announced that the selections for future readings were not confined to biography or essays, but covered very generally the whole field of literature, wherever he could find anything of especial value to a young man.

CALENDAR.

FRIDAY, JANUARY 5.

- 1.30 P.M. Weekly Y. M. C. A. Meeting in Huntington Hall.
- 4.00 P.M. Prof. Bjerknes addresses Department of Physics in 22 Walker.
- 7.30 P.M. Organization Meeting of Mechanics Arts High School Club at the Tech Union.
- 8.00 P.M. Second of Series of Lowell Institute Lectures on "The Development of Shakespeare as a Dramatist," in Huntington Hall.

SATURDAY, JANUARY 6.

- 8.00 P.M. Basket Ball Game, Tech vs. Williams, at Williamstown.
- 8.00 P.M. Basket Ball Game, Tech 2d vs. Malden High School, at Malden.

MONDAY, JANUARY 8.

- 1.00 P.M. Freshmen Class Meeting in Huntington Hall.
- 4.00 P.M. Trials for 1908 Relay Team at the Gym.
- 8.00 P.M. Chess Match, Tech vs. Jamaica Plain, at the Boston Chess Club's Rooms.
- 8.00 P.M. Third of Series of Lowell Institute lectures on "The Scientific Principles Underlying the Art of Painting," in Huntington Hall.

FACULTY NOTICE.

Second Year Chemistry.—On and after Thursday, January 11, all students in Mr. William T. Hall's sections will be asked to work without reference to any text-book. Each student will be assigned three simple substances to identify and but three hours will be allowed for the analysis of any one substance.

NOTICES.

1908 Class Canes. All men who want class canes must make a deposit of \$1.00 to a member of the committee before Saturday. Price of canes \$2.80.

Dual Meet Cups.—The winners of the first and second places in the events of the Sophomore-Freshman Dual Indoor Meet may get their cups by applying at the Cage.

Mechanic Arts High.—The organization of the Mechanic Arts High School Club will take place at the Union this evening at 7.30 P.M. Tickets can be obtained from Fales, '07, Weiler, '08, Hinckley, '06, and Baker, '08.

1908 Relay Team.—Trials for 1908 Relay Team entered in the Annual Class Indoor Meet will be held at 4 P.M. Monday at the Gym. Distance will be 400 yards. All middle and long distance men are expected to come out.

Dept. of Physics.—Prof. Vilhelm Bjerknes, Professor of Mechanical and Mathematical Physics in the University of Stockholm, will address the instructors of the Department of Physics on "Hydrodynamic Fields of Force" this afternoon at 4 P.M., in 22 Walker.

The Tech

Published every Monday, Wednesday and Friday during the college year (from September to June), by students of the Massachusetts Institute of Technology.

Entered as second-class matter October 6, 1904, at the post office at Boston, Mass., under the Act of Congress of March 3, 1879.

WILLIAM A. NICHOLS, PRINTER, 208 SUMMER ST., REAR

By this time, no doubt, you have learned that it is easier to make a good resolve than to carry it out.

From the present indication the Hockey Team this year will be but a name. According to the schedule issued earlier by the manager, it was understood that two games were to be played in New York during the Christmas vacation, but THE TECH has just discovered that these games were never arranged. The motive for announcing games that were not definitely decided on is and must remain obscure. The failure to have a good schedule might be excused, but the indifferent manner in which the Hockey Association officials perform their duties cannot be overlooked when we stop to consider that hockey is one of our recognized Technology sports. A poor team, or no enthusiasm among the members of the team, reflects discredit on the Institute.

The question of a rink is not settled as yet, though it was widely reported that a rink at the American League Grounds had been obtained. That this matter was not arranged before the Christmas vacation is by no means creditable to the manager. Hockey at Tech is, at best, a hard sport to carry on successfully, but last year's efforts and their results demonstrated what can be accomplished. The hope that every one concerned will realize the discredit which might be reflected on Technology unless increased energy and united action accomplish results such as all saw last year.

ENGINE TEST RUNNING.

An engine test has been running continually, day and night, since 8 o'clock last Monday morning, and does not end until 4 o'clock tomorrow afternoon. Prof. Miller is in charge of the test.

The test is divided into four stations, the boiler test, the Russell engine test, the Westinghouse engine test and the dynamo test. The boiler test is being carried on with two Bancroft-Wilcox boilers running up to 160 lbs. pressure; the coal and ashes are weighed, and feed water measured. An addition to last year's test is the use of a forced draught under the boilers; every hour an analysis of the flue gases is made.

Last year the engine test was carried on only during the day, but this year the Russell engine runs during the day, and the Westinghouse from 4 o'clock in the afternoon to 8 o'clock the next morning. The indicated horse power of the engine is found; the steam per horse power hour; and the thermal efficiency of the engine. Tests are also taken on the circulating and air pumps and the cooling tower. The dynamos are measured by the Course VI men.

The men carrying on the tests are divided into sixteen groups, with four to twenty men in a group; each group serves through one of the shifts; from 8 A.M. to 4 P.M.; from 4 P.M. to 12 P.M.; or from 12 P.M. to 8 A.M. The instructors have to take turns as well as the men. The electrical stations are in charge of Prof. Puffer.

Freshmen.—There will be a meeting of the Freshman class in Huntington Hall Monday at 1 P.M.

1906 HOLDS ANNUAL DINNER.
 (Continued from page 1.)

Toastmaster Williams next called on a member of the class, William Furrer, who said he often lamented the predominance of the practical side of a Tech man's nature, but went on to show that at least humor is not wanting by calling forth universal merriment in reading selections from a witty sketch, entitled "The Log of the Water Wagon."

Professor Sedgwick, who spoke next, began by expressing his wish to know better personally the members of the class. The student, he maintained, should, as far as possible, endeavor to get personally acquainted with his professors, so as to work hand in hand with them.

The Seniors are the ones who have "lived through the war" and are about to go into active work and to represent Technology and all for which she stands. Technology graduates at the present day have great opportunities before them, and there is a great demand for the right men. No student need ever worry about his ultimate success as long as he keeps intact his health and character.

Modesty and honesty are indispensable attributes, and are in great demand today especially, on account of the gigantic disclosures of graft which have lately shocked the country in connection with the insurance scandals. Technical men, he was glad to say, have practically never been accused of dishonesty.

At one time the distinction was not drawn, and still is not in some sections, between a tradesman and a professional man. The difference, however, is great. The latter goes farther than the former; he understands the principles and theory of his work and is actuated not merely by monetary considerations but by the love of his vocation. Although Tech graduates are of necessity at first rather narrow, they thereby have a better chance of success in their professions, and later have plenty of chance for producing and becoming cultured citizens.

On behalf of the Portfolio committee S. C. Coey then spoke a few words about the necessity for haste in finishing with the photographer, as the matter is this year unusually late. The Class Day elections were then read by President Coe; and H. C. Henrici, the First Marshal-elect, responded to the popular clamor by acknowledging in a short speech the honor which his classmates had conferred upon him. The gathering broke up after a cheer.

Central Church, Newbury and Berkeley Streets. Services Sunday at 10.30 and 4. Music by Tours at Vespers. Mr. Denison will speak on "New Styles for the New Year." Professor Moore of Harvard lectures at noon on Buddhism. Young People's Discussion in Club Room at noon. Subject: The Use of Physical Force. Social Sunday Evening in the Chapel 7.30 to 10.

CATHOLICS FORM CLUB.

Thirty-eight Technology men of the Roman Catholic religion met at the Tech Union last evening to consider the advisability of forming a Catholic organization similar to the Catholic Clubs at other colleges. Theodore Dissel, '06, was appointed temporary chairman, and Allan Pope, '07, temporary secretary. The speakers were Father Farrell, Spiritual Director of the St. Paul's Catholic Club of Harvard, Wm. T. Mooney, Vice-president of that club, and Prof. Porter.

The meeting decided to take the steps to form an organization, and the chairman was instructed to appoint a committee of five to draw up

a Constitution and By-Laws, the chairman to be one of the members.

The purposes of the organization as stated by Father Farrell were first, to bring the Catholic students together; second, to promote the interests of the Catholic religion; third, to have the Catholic religion better known among the non-Catholic students; and, finally, to cultivate good-will between Catholics and non-Catholics.

Tutoring for conditions in all entrance subjects except Science.
